German Dry Docks GmbH & Co. KG represents the merger of two good, old familiar corporate entities:

Rickmers Lloyd Dockbetrieb GmbH & Co. KG and the **Ship Division of the company MWB AG**.

Effective on 1 January 2013, we merged these two entities to form the company German Dry Docks GmbH & Co. KG. This reorientation of ship-repair business has been made possible by a new shipyards alliance in the north of Bremerhaven.

Until now, our two companies went our own separate ways. In the future, however, we will exploit all networks and synergism possibilities to provide you as customer with the best and most cost-effective service. The core activities of our new company – as the name expresses – centre around our altogether 6 floating and dry docks. They are from 147 meters until 335 meters length in size, and are located in the direct vicinity of two large-scale locks as gateway to the North Sea. Fundamentally, however, nothing has changed in our basic approach to performance, expertise, and customer orientation. We have merely taken effective action and have merged our strengths, to enable us to be even more extensively represented on the market. This will most of all benefit you as our customer.

The corporate headquarters of German Dry Docks will in future be at the address Barkhausenstrasse 60, 27568 Bremerhaven, Germany. We will, however, continue production at our plant locations at Bückingstrasse, next to Lloyd Shipyard, as well as on the plant site of the former MWB Ship Division at Barkhausenstrasse.

Around 100 employees are at work for German Dry Docks. These are our experienced and proven staff from Rickmers Lloyd und MWB Ship Division. In addition nothing has changed in our management.

BENEFITS OF BARDEX CHAIN SHIPLIFT & TRANSFER SYSTEMS

SAFETY

- The safest, most dependable ShipLift system in the world
- Bardex Chain ShipLift systems never drop ships
- Chains do not hide internal corrosion like wire rope
- Chain ShipLift uses two chains at each lift point for redundancy
- Chain ShipLifts offer simple, reliable synchronization

EFFICIENCY

- Proven chain life of 15-20 years
- Lower capital cost of lift equipment and associated civil works
- Compact design, uses smaller diameter piles, and less concrete reinforcement means less pier & deck space requirements than wire rope winch systems
- Lower maintenance costs – no annual destructive tests of wire ropes & no replacement requirement of all ropes every 5 years

EXPERIENCE

- 50+ year history providing ShipLift systems
- Strong engineering team with over 100 years combined experience with ShipLifts
- In-house lifecycle support – experienced field service engineers supporting from concept, construction, and installation to end-of-life

INSTALL SOME SIGNIFICANT UPTIME

ALLWEILER'S OPTIFIX™
PROGRESSING CAVITY PUMPS

UP
TO
85%

FASTER
MAINTENANCE
TIMES
compared to
standard designs

Able to disassemble in 5 easy steps, the Allweiler OptiFix offers best-in-class mean time to repair, which means less downtime, less maintenance and fewer service costs.

And by outfitting your pump with an ALLDUR® stator, **you can extend pump life by up to 500%**. Simply put, you won't find a better pump at keeping ROI up and downtime down.

Find out more by visiting us at
circorpt.com/optifix
